

Rattant Wittayapanich

Penetration Tester & Security Developer

CONTACT

- 080-157-6186
- rattant2201@gmail.com
- 524/5 Ubon Ratchathanai

EDUCATION

- Bachelor of Science in information technology
Khon Kaen University, College of Computing
GPA: 2.41

SKILL

- Security**
 - Penetration Testing
 - Nmap
 - SQLMap
 - Aircrack-ng
 - Burp Suite
 - RTSP/ONVIF Camera Testing
 - CVE/NVD Analysis
 - STRIDE Threat Modeling
- BACKEND**
 - Python
 - FastAPI
 - SQLite
 - REST API Design
 - Docker
- IoT/Embedded**
 - Arduino
 - Sensor Integration
 - RFID & Card
- Tools**
 - GitHub
 - VS Code
 - Postman
 - Vercel
 - Draw.io
 - Figma
- Communication Skills**
 - Thai (Native)
 - English (Intermediate)

SUMMARY

Recent information technology graduate from Khon Kaen University specializing in offensive security and full-stack development. Hands-on experience building AI-powered penetration testing platforms using FastAPI, React, and the Claude API. Passionate about identifying vulnerabilities, automating security workflows, and developing practical cybersecurity tools. Certified in ITPE (IP Level) and actively pursuing eJPT.

RESEARCH & ACADEMIC WORK

AutoBot Pentest: AI-Driven Automated Penetration Testing Platform
Submitted to National Conference on Information Technology (NCIT 2026)

- Designed and implemented a full-stack AI-powered pentest platform covering 5 scan domains: Web Application, Network, Server/Host, Wi-Fi, and CCTV/IP Camera
- Integrated Claude AI Engine for automated threat modeling (STRIDE), CVSS v3.1 scoring, and vulnerability recommendations
- Utilized NVD API with CPE-based matching for real-time CVE detection and risk assessment
- Published research paper in Thai with two-column NCIT format, co-authored under academic advisor

PROJECTS

AutoBot Pentest AI-Powered Penetration Testing Platform
AI-Powered Penetration Testing Platform

- Built a full-stack automated pentest platform with role-based access control and admin dashboard
- Implemented 5 scan modules integrating tools: Nmap, SQLMap, Aircrack-ng, and RTSP camera capture
- Developed CPE-based NVD API matching with confidence scoring for accurate CVE identification
- Integrated Gmail SMTP notifications and PDF/DOCX evidence report generation
- Deployed scan targets using Docker (Metasploitable2, DVWA) for real-world attack simulation

HiveAgent

Multi-Agent Web Penetration Testing Orchestrator

- Designed a multi-agent orchestration system for automated bug bounty hunting workflows
- Built MCP server bridge between Windows backend and Kali Linux toolchain via WSL2
- Implemented Scope Enforcer, Blueprint System, Duplicate Checker, and Auto PoC Generator
- Integrated local LLM (Qwen3:4b via Ollama) for offline AI-assisted vulnerability analysis

CERTIFICATIONS

ITPE — Information Technology Passport Examination (IP Level)

ITPEC & NSTDA (National Science and Technology Development Agency of Thailand) | Cert No. THIP24A0082
